

# 2022 Workshop on Pruning

While waiting for the new greenhouse to be built, the Education Committee decided to have some workshops held every other Tuesday. The first one was on March 1 and started in the courtyard at Beardsley and later moved into the Agave Room.

Jim Consolloy gave a demonstration on proper pruning techniques and answered many questions.

LiAnn Hathaway showed the members several pruning tools and distributed several handouts on the process.

Since the topic generated a great deal of interest, a second session was planned for March 15.
